

DealStats Value Index Q4 2023

The *DealStats Value Index* summarizes valuation multiples and profit margins for acquired private companies by time period, sector, and size. Business Valuation Resources (BVR) captures this private company transaction data in its DealStats platform. Most BVR deals are not otherwise publicly available. The *DealStats Value Index* is updated quarterly and, as a result, past figures may change in future issues as new data are reported.

EBITDA MULTIPLES RETURN TO TYPICAL LEVELS IN 2023

In the time period analyzed, EBITDA multiples across all industries were highest in the third quarter of 2018, at 5.0x, and there has been a downward trend from that high point until the second quarter of 2022. Since then, EBITDA multiples have generally been trending upward, reaching 3.6x in the second quarter of 2023 before slightly decreasing in the third quarter of 2023, to 3.4x.

EXHIBIT 1A. MEDIAN SELLING PRICE/EBITDA WITH TRAILING THREE-QUARTER AVERAGE (PRIVATE TARGETS)

NET SALES MULTIPLES NORMALIZE IN Q3 2023

In the quarters analyzed in this report, net sales multiples were at their highest in the fourth quarter of 2021, at 0.58x. Since then, net sales multiples moved to 0.49x in the third quarter of 2023. Since the third quarter of 2020, net sales multiples have generally been increasing, according to the three-quarter trailing average. This contrasts with the previous declining trend from the fourth quarter of 2017 to the second quarter of 2020. The lowest multiple recorded since the fourth quarter of 2017 was 0.43x in the second quarter of 2020.

The selling prices referred to in the *DealStats Value Index* represent the market value of invested capital (MVIC) price paid for the target firm. The MVIC price is the total consideration paid to the target and includes any cash, notes, and/or securities that were used as a form of payment plus any interest-bearing liabilities of the target company that the acquirer assumed. For more information, please visit the DealStats FAQ page: bvresources.com/products/faqs/dealstats.

The multiples and transaction data presented in the *DealStats Value Index* include both asset sale purchases and stock sale purchases. Unless otherwise noted, the multiples and transaction data presented in the *DealStats Value Index* include purchases made by both private parties and public parties.

EBITDA MARGINS RISE IN 2022 AND MAINTAIN HIGH LEVELS IN Q3 2023

EBITDA margins began to decline in the second quarter of 2022 but have trended positively since then, reaching 16% in the third quarter of 2023.

EBITDA margins were at their highest point in the first quarter of 2023, at 18%. The previous range was between 11% and 15%, from the first quarter of 2019 through the fourth quarter of 2021. Since the fourth quarter of 2017, EBITDA margins have never been below 11%.

EXHIBIT 2. MEDIAN SELLING PRICE/EBITDA WITH EBITDA MARGINS (PRIVATE TARGETS)

ALL-TIME MEDIAN EBITDA MULTIPLE FOR ALL SECTORS IS 4.1X

All-time EBITDA multiples remain the highest for the information sector (11.0x) and the utilities sector (8.1x). Meanwhile, the lowest all-time EBITDA multiples are in the accommodation and food services (2.6x) and the other services sectors (3.1x). The median across all industry sectors for all time periods is 4.1x. The information sector has shown a notable recent increase, with the last 12-month EBITDA multiple rising to 16.8x when compared with its all-time period multiple of 11.0x.

EXHIBIT 3. MEDIAN SELLING PRICE/EBITDA BY SECTOR (PRIVATE TARGETS)

EBITDA MULTIPLES FOR PRIVATE-BUYER/PRIVATE-SELLER TRANSACTIONS RISE IN 2023

The all-transactions category has been generally trending downward since 2020. EBITDA multiples for private-buyer transactions involving a private seller were the only group to see an EBITDA multiple increase in 2023 year to date, rising to 3.4x from 3.1x.

EXHIBIT 4A. MEDIAN SELLING PRICE/EBITDA (PRIVATE TARGETS)

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

NET SALES MULTIPLES FOR PUBLIC-BUYER/PRIVATE-SELLER TRANSACTIONS CONTINUE TO RISE

The all-transactions category declined to 0.54x in 2023 year to date, a 2% decrease compared to 2022. The lowest value for the all-transactions category in the time periods analyzed continues to be 0.47x in 2020. Among all the transaction-type categories, net sales multiples for public buyers and private sellers were the only group to exhibit an increase in their net sales multiple, rising by 4%, from 2.95x in 2022 to 3.08x in 2023 year to date.

EXHIBIT 4B. MEDIAN SELLING PRICE/NET SALES (PRIVATE TARGETS)

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

PRICING MULTIPLES AND PROFIT MARGINS ARE ON THE MOVE

As shown in the legend for Exhibits 5A to 5C and Exhibits 6A to 6C, pricing multiples for private-target acquisitions are displayed across four net sales ranges. Exhibit 5A shows a decline in the net sales multiple in 2023 year to date for all size ranges.

Seller's discretionary earnings (SDE) multiples displayed a negative trend in 2023 year to date for companies across all size ranges, with the exception of companies with net sales greater than \$10 million (which have had a 13% increase compared to the previous year).

EBITDA multiples in 2023 year to date have seen a notable increase for companies in the size range of up to \$1 million (20% increase compared to 2022) and have shown a notable decrease for companies with a net sales greater than \$10 million (33% decrease compared to 2022).

Profit margins for companies across all size ranges have generally been increasing in 2022 and have maintained this trend through 2023 year to date.

EXHIBIT 5A. MEDIAN SELLING PRICE/NET SALES BY NET SALES RANGE (PRIVATE TARGETS)

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

EXHIBIT 5B. MEDIAN SELLING PRICE/SDE BY NET SALES RANGE (PRIVATE TARGETS)

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

EXHIBIT 5C. MEDIAN SELLING PRICE/EBITDA BY NET SALES RANGE (PRIVATE TARGETS)

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

EXHIBIT 6A. GROSS PROFIT MARGIN BY NET SALES RANGE (PRIVATE TARGETS)

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

INTERQUARTILE RANGES ARE FAIRLY CONSISTENT

Exhibits 7A through 7D display the interquartile range of the selling price-to-net sales and selling price-to-EBITDA multiples by major industry sector and by year for private targets. In addition to showing the median multiples by sector and year, the interquartile range provides a measure of dispersion. Interquartile range is the difference between the 25th and 75th percentiles (also called the first and third quartiles), so the interquartile range describes the middle 50% of observations. The top of the gray bar indicates the 75th percentile, the bottom of the brown bar indicates the 25th percentile, and the line where the two meet represents the median. A large interquartile range indicates that the middle 50% of observations are spaced wide apart, and, if the interquartile range is narrow, the middle 50% of observations are spaced close together.

As shown in Exhibits 7A and 7B, the information sector has the greatest median selling price-to-net sales multiple and selling price-to-EBITDA multiple, as well as the greatest spread between the 25th percentile and 75th percentile. When looking at the data by year (Exhibits 7C and 7D), the median selling price-to-net sales multiple is consistently around 0.5x, while the selling price-to-EBITDA multiple is generally between 3.0x and 4.0x.

TEN-YEAR TREND FOR PRIVATE-SELLER SECTOR MULTIPLES

Exhibits 8 through 13 display median multiples paid for private targets, as well as median profit margins, and are organized by industry sector. Multiples across the 15 sectors appear to rise and fall based on cyclical trends.

Median net sales multiples decreased in 10 of the 15 sectors in 2023 year to date. The sectors that saw a significant decrease were the information and transportation and warehousing sectors, with a decrease of 32% and 24%, respectively.

Median seller's discretionary earnings (SDE) multiples declined in nine of the 15 sectors in 2023 year to date. Among the sectors that saw a significant increase in its SDE multiple was the finance and insurance sectors, where its SDE multiple increased by 27%.

Median EBITDA multiples are trending positively across most sectors in 2023 year to date. The sectors that saw the most notable declines were educational services and manufacturing (a decline of 26% and 19%, respectively).

In 2023 year to date, median gross profit, operating profit, and net profit margins are generally moving downwards or are maintaining levels similar to those in 2022, with the exception of the arts, entertainment, and recreation sector, which had a notable 12-percentage-point increase in profit margin.

Note: Each data point in this chart is based on a minimum of 10 transaction multiples. If there are not enough transaction multiples for a particular year or quarter, the data are not included.

PUBLIC BUYERS PAY HIGHER MULTIPLES FOR PRIVATE TARGETS THAN PRIVATE BUYERS DID

Exhibits 14 and 15 compare the median valuation multiples private buyers paid (those transactions business intermediaries brokered) to what public-company buyers paid based on major industry sector groups.

Across all NAICS sectors, public buyers paid higher multiples for private targets than private buyers paid. This may partially reflect synergies between the public buyer and the private target. Also, the typical acquisition public buyers made was larger than those private buyers made, so it is possible to conclude that larger companies sell for higher multiples than smaller companies, which is further highlighted in Exhibits 5A through 5C.

EXHIBIT 14. MEDIAN SELLING PRICE/NET SALES— ALL TIME PERIODS (PRIVATE TARGETS)

0.1350

EXHIBIT 15. MEDIAN SELLING PRICE/EBITDA- ALL TIME PERIODS (PRIVATE TARGETS)

HOW DO INDUSTRY PRICING MULTIPLES AND PROFIT MARGINS COMPARE?

Exhibits 16A through 17C compare pricing multiples and profit margin ratios across 18 industry sectors. Companies within the mining, quarrying, and oil and gas extraction sector; the finance and insurance sector; utilities sector; agriculture, forestry, fishing, and hunting sector; and the information sector clearly transact at higher net sales and earnings-based pricing multiples than most other companies in other industries (see Exhibits 16A to 16E). The trend for margin ratios is less evident among the 18 industry sectors, although companies in the information sector appear to operate less efficiently, with a median operating profit margin of 1% and a median net profit margin of -1.0% (see Exhibits 17A to 17C).

EXHIBIT 17C. MEDIAN NET PROFIT MARGIN- ALL TIME PERIODS (PRIVATE TARGETS)

MEDIAN SELLING PRICE MAINTAINS HIGH LEVELS IN 2023

Exhibit 18A shows that the median selling price moved from its previously highest level of \$375,000 in 2021 to \$370,000 in 2023 year to date. Median net sales amounts reached a new high of \$754,186 in 2023 year to date, which was a 2% increase from 2022. Both the median selling price and median net sales are continuing to trend positively since 2020.

EXHIBIT 18A. MEDIAN SELLING PRICE AND MEDIAN NET SALES (PRIVATE TARGETS)

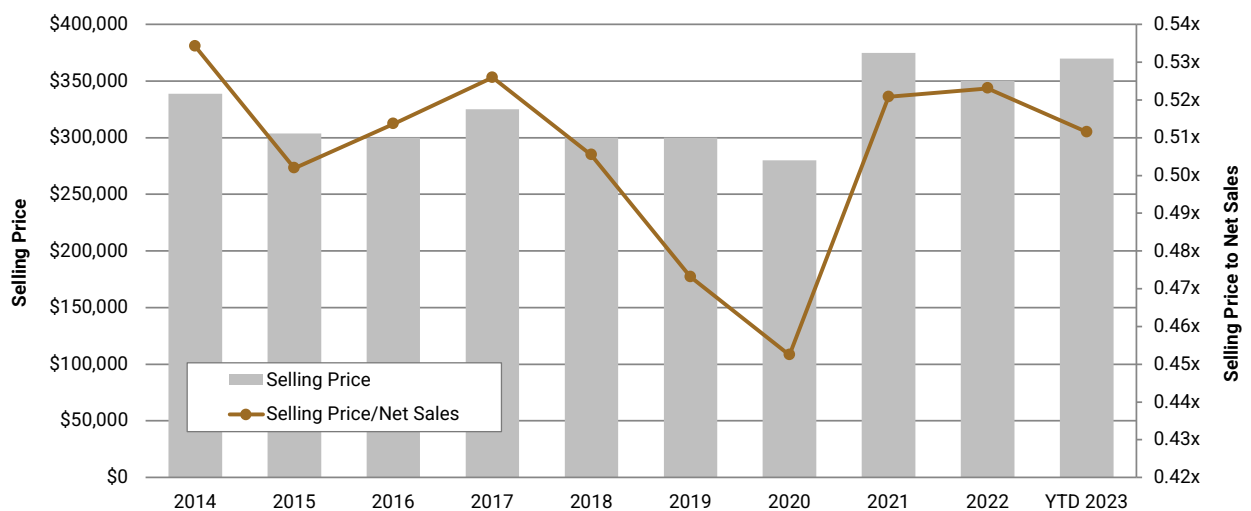

EXHIBIT 18B. MEDIAN SELLING PRICE AND MEDIAN SELLING PRICE/NET SALES (PRIVATE TARGETS)

FIRST HALF OF 2023 SHOWS TYPICAL DISCOUNT LEVELS

Exhibit 19 best illustrates the negotiation process between buyers and sellers in which both asking prices and sale prices continually fluctuate during the highlighted period, as well as historically. What a seller's business is likely to sell for has effectively been different than the original asking price and is based on cyclical trends in the economy as well as the buyers' assessment of financial conditions, industry comparables, potential return on investment, and the goodwill worth of the business as a going concern, among other considerations. The largest discount recorded in the reported period (second-half 2017 to first-half 2023) was 23.1%, which was in the first half of 2021. Typical discount levels range between 16% and 18%. The most recent discount in the first half of 2023 is 15.1%.

EXHIBIT 19. MEDIAN ASK PRICE VS. MEDIAN SALE PRICE SEMIANNUALLY (PRIVATE TARGETS)

MEDIAN DAYS TO SELL INCREASED IN THE FIRST HALF OF 2023

Days to sell are the number of days it takes to sell a business (the difference between the date the business was listed for sale and the date the sale closed).

The first half of 2023 shows a comparable 241 days when analyzing historical years. The second half of 2020 continues to be the highest period reported when it comes to the time it takes to close a sale (305 days).

EXHIBIT 20. MEDIAN DAYS TO SELL SEMIANNUALLY* (PRIVATE TARGETS)

* Based on the sale date of transactions.

OVERVIEW OF OWNER'S COMPENSATION

Exhibits 21 through 22 display various statistics on owner's compensation broken down by sector and size.

Owner's compensation figures are based on all transactions in the DealStats database, where historical information has been adjusted for inflation. Inflation adjustments are based on CPI (CPIAUCSL) figures, where average adjustment factors are developed for each year. Annual average adjustment factors are then applied to every owner's compensation figure for each transaction in the database.

Across all statistical measures (25th percentile, median, average, 75th percentile), owner's compensation increases as the size of the company increases.

The mining, quarrying, and oil and gas extraction sector has the highest median owner's compensation (\$255,551), while arts, entertainment, and recreation has the lowest median owner's compensation (\$38,462). Healthcare and social assistance is a close second to the mining, quarrying, and oil and gas extraction sector, where it has the highest average and 75th percentile median owner's compensation among all industries.

When observing owner's compensation by sector and size, we can see that the healthcare and social assistance sector has the highest median owner's compensation across all size groups (except for companies with net sales larger than \$10 million).

Get the most current and comprehensive valuation data & research available with BVR's suite of resources

Every informed stakeholder in business valuation, performance benchmarking, or risk assessment turns to Business Valuation Resources (BVR) for authoritative deal and market data, news and research, training, and expert opinion. Rely on BVR for the most trusted business valuation intelligence. BVR's data, publications, and analysis have won in the boardroom and the courtroom for over two decades.

Deal & Market Data

Get the most detailed data on the market, used by business appraisers, business brokers, investment bankers, and more.

- Private & Public Transaction Data
- Cost of Capital Data
- Discounts & Premiums
- Economic & Industry Research

News & Research

Access the most timely content you need to stay current with developments in the valuation profession.

- Professional News
- Case Law
- Valuation Research
- Books, guides & reports
- Blogs
- Ezines

Training & CPE

Earn CPE credits from anywhere with BVR's training programs featuring top thought leaders.

- Webinars
- Workshops
- eLearning
- Self-study
- Live Events
